

July 29, 2009

L.H. Tanner Construction has been influential in the growth of our business over the past eleven years. Through each phase in the evolution of Club Performax , L.H. Tanner Construction has been there and has always delivered for us.

In 1998 L.H. Tanner Construction built Performax's first health studio. L.H. Tanner Construction had the vision to take a small retail space and turn it into a viable, multi-purpose personal training facility, the first of its kind in Brevard County.

In 2001 the need to expand was evident and L.H. Tanner Construction was there again from inception to completion as we opened Club Performax, the first upscale health club and training facility in our area. L.H. Tanner Construction helped create a state-of-the-art center that was extremely functional yet very warm and inviting. This location of the build out was an 8500 square foot, empty shell.

In 2008 L.H. Tanner Construction completed our newest expansion, a 10,000 square foot ultra-modern health club and athletic training facility. This location is one of the most unique and cutting edge clubs in the Southeast. L.H. Tanner Construction was involved in every stage of this project, transforming a grocery store into an eye-popping playground for fitness and high-end personal training. Club Performax-Suntree also boasts a 13,000 square foot outdoor area as well.

Every project L.H. Tanner Construction has completed for us has been on-time and on- budget. Their sub-contractors are professional and the entire company has always been a pleasure to work with. We have always been pleased with the knowledge and skill the company brings to a project. And unlike some firms, they also bring creativity and a willingness to really get to know their clients' needs to the process. We highly recommend L.H. Tanner Construction and we intend to use them again for any future projects.
